Press Release

The new universal quick release device with double safety facility against unintended unlocking of the camera.

The Flip-lock® device permits, by virtue of its three unique setting positions: fastening or unlocking of the camera configuration at lightning speed, sliding in longitudinal direction to calibrate the centre of gravity and clamping with the safety device. The new, patented Flip-lock® quick release facility is available in two lengths of 60 and 84mm with the usual 1/4" and 3/8" threads.

Furthermore, owners of an ARCA-SWISS Monoball can have their existing camera receptacle refitted with the Flip-lock® quick release device.
